### **New courts ready for netball season**

With the netball season fast approaching Council has been working with contractors to ensure the new four court complex in Smith Park, funded under the NSW Government's Stronger Country Communities Fund is completed by 3rd May, as advised by the contractor.

The construction work was completed in late 2018 and with the extreme temperatures experienced in the region over the past six months the contractor advised Council that it was necessary to postpone the laying of the cushioned playing surface until mid-April 2019.

Council's Director of Corporate and Urban Services, Bruce Quarmby said, "Several project updates had been provided to Council over the past months and with cooler weather conditions we are now able to apply the top of the line Laykold Masters Float system to the court surface".

"The contractors will be in Coonamble early next week to commence the works in readiness for the start of the netball season", Mr Quarmby added.
